Smart Tech for Safer Driving

A **co-pilot** for you and your loved ones.
Drive safe. Monitor your driving habit.
Improve your skills. Offers peace of
mind for **parents of teenage drivers.**

Meet CarVi: Versatile, Affordable and Easy to Install Driver's Assistant

CarVi employs the vision-based safety tools to gather data, using a small dashboard camera installed in your car that "talks" to your cell phone.

The camera captures video which CarVi analyzes in real time. If it senses potential trouble, it issues audible and visual warnings.

CarVi monitors:

Lane Changes - CarVi adds an extra set of "eyes" to your driving, monitoring your position in the lane and the location of the car ahead.

Front End Collision Danger - CarVi monitors your distance from the driver in front of you. Not only will it warn you if you come too close, but it will also help you practice maintaining a safe distance if you're prone to tailgating.

Reckless Driving and Hard Braking - CarVi learns your driving patterns and helps you adjust.

Jackrabbit Starts - You may not even notice certain driving habits once you get used to them. CarVi helps you learn to give your car just enough gas to efficiently ease into the flow of traffic.

But **CarVi doesn't stop working when you turn off your engine.** The smartphone interface displays your driving data, providing your **driving "SKOR" for the day**, and showing you the areas where you did well, and where you might need some work. With the data it collects, **CarVi gives you suggestions on how to improve your driving skills.**

Who Needs CarVi

PARENTS OF NEW DRIVERS

Did you know that motor vehicle crashes are the leading cause of death for U.S. teens?

1 in 5 of 16-year-old drivers has been involved in an accident within their first year of driving.

Being parents ourselves, we want to protect our and YOUR kids from the danger.

ELDERLY DRIVERS

Older people have a higher risk of getting into a car accident due to a slower reaction and reduced vision.

They have significantly higher death rates because of fragility that makes surviving a crash more difficult. Your parents have taken care of you all your life. Now, it's your turn!

EVERYBODY ELSE

who wants to have a peace of mind while driving.

CarVi puts a team of virtual driving experts in the driver's seat alongside you.

Improve the safety on the road for yourself, your family and people around you.

The Team of Experts You Can Trust

CarVi, a Silicon Valley technology company, was started by trailblazing driver assist engineers whose goal was to make top-of-the-line driving safety features available to everyone. CarVi's team members have more than 20 years of experience in design and development of value-added technology products for the automobile industry.
